EDUCATION

John Jay College of Criminal Justice, City University of New York (CUNY), New York, NY

B.S. in Computer Science and Information Security

June 2026

Concentration: Cybersecurity | **GPA:** 3.90/4.00, *Dean's List*

Related Coursework: Data Structures, Object Oriented Programming, Operating Systems, Discrete Math

SKILLS

Tools & Platforms: Git, PyCharm, Tableau Eclipse, OpenVAS, Firewalls, Proxmox, Microsoft Sentinel, MISP, Word, Excel, PowerPoint

Cloud & Systems: Azure, Windows Server, Linux, Docker

Languages and scripting: Python, Bash, SQL, Java

Certifications & Awards: Google Cybersecurity Professional Certificate, IBM SB Hackathon Winner 2025

EXPERIENCE

BastionX

New York, NY

Information Technology Intern

Jan 2026 - March 2026

- Deployed and configured network firewalls and security controls, integrating them with switching infrastructure to support secure enterprise client environments.
- Installed and managed virtualized infrastructure (Proxmox), provisioning Windows Server and Linux VMs for security testing and systems administration.
- Assisted with server hardening, patching, and system configuration across Windows and Linux environments.
- Supported troubleshooting of network, system, and security issues, documenting findings and communicating resolutions to clients and internal teams.

CUNY Tech Prep

New York, NY

Data Science Fellow

Jul 2025 – February 2026

- Selected for a competitive, year-long fellowship with students across 11 CUNY senior colleges to build technical data science projects.
- Apply Python, Pandas, SQL, and Scikit-learn to EDA, feature engineering, statistical modeling, machine learning, and big data workflows.
- Participate in weekly courses focused on industry best practices, data visualization, and collaborative project development.

New York Edge

New York, NY

Data Specialist

Mar 2024 – Sep 2025

- Managed and analyzed attendance data, ensuring accurate uploads to the DYCD data portal and producing detailed reports to highlight attendance discrepancies.
- Designed and optimized scheduling processes, boosting departmental efficiency and operational coordination.
- Resolved a wide range of technical issues, enhancing system functionality and user support through effective troubleshooting and maintenance.

New York City Department of Education (NYC DOE)

New York, NY

IT Support Intern

Oct 2024 – Jan 2025

- Supported 500+ users with hardware, software, and network troubleshooting while maintaining data integrity and security.
- Streamlined device distribution and setup across DOE sites, enhancing tech equity and reducing downtime.

PROJECTS

AI-Powered Threat Intelligence Dashboard | [Capstone Project](#) |

Jan 2026 - May 2026

- Built automated n8n workflows to collect and enrich threat data from AlienVault OTX, Krebs on Security, and NVD CVE feeds, extracting and categorizing IOCs including IPs, domains, URLs, and file hashes.
- Designed a Streamlit SOC-style dashboard featuring an analyst priority queue, severity analytics, threat origin map, and deep dive view for actionable threat triage

Cloud-Based Security Operations Center

Sep 2024 - October 2024

- Built a SOC in **Microsoft Azure** integrating **Microsoft Sentinel** for centralized monitoring and automated threat-intelligence ingestion via **MISP** in Docker.
- Configured an RDP honeypot and API integrations to enable real-time analysis of threat indicators, boosting detection efficiency.

ACTIVITIES AND LEADERSHIP

Cyber Security Associate, Association for Information Systems

Sep 2023– May 2024

Member, John Jay Cyberhounds

Sep 2023– May 2024
